ALEXANDRIA GAZETTE
THE AMERICAN IDEA.

Individualism the Keynote of Our National Success.

Charles L. Edgar and Walton Clark of the National Civic Federation Commission on Municipal Ownership Show Why American Institutions Should Not Be Abandoned at the Demand of Socialists and Municipalizers.

The efforts of the National Civic Federation have resulted in a commission of Americans whose first interest in this investigation, as in all else, is to do what they may to preserve and continue the American Idea and American Institutions, believing that the high state of civilization and prosperity in America justifies the American Idea and the American method and places the burden of proof heavily upon those who would say another idea and another method would result in improvement in the condition of the people.

Believing this to be the thought and intent of the membership of the commission and of the committee subordinate to it, we still believe that there are ills in the American body politic that may be remedied or cured. We believe that the remedy should be applied and the cure effected without any unnecessary departure from the American Idea and the American system.

We believe that the framework upon which may be built purity of administration and the highest possible good of the citizens is in existence with us and that it is not necessary in the effort to cure the ills from which the body politic may be suffering to destroy that body. We submit that, living in a land where peace and prosperity are the common lot, we must be very cautious of change. This does not mean that where abuses are found to exist they should not be promptly and mercilessly eradicated, but it does mean that changes in system should be undertaken only after conclusive proof that such changes will result in bettering the condition of the individual. We had better bear the relatively few ills we have than subject ourselves to unknown conditions that may bring in their train greater ills of which we do not know.

Our investigation has determined with certainty many heretofore mooted questions. It indicates the probably correct answers to other mooted questions. Where the facts are clear and the conclusions evident our task has been to summarize and indicate. Where there is remaining uncertainty as to facts and conclusions are not evident we have made an effort to determine the probabilities. This has resulted in arguments based on such facts as our investigators have recorded and on our own experience as operators and observers.

We believe no intelligent reader of the voluminous record of this commission's work will fail to conclude that it clearly proves municipal ownership to be productive of many and serious ills, with little or no compensating good.

The writers of these chapters, agreeing, we believe, with the other members of the committee of twenty-one, that public service companies should be regulated and that the committee was not appointed or constituted to consider methods of regulation, nevertheless desire to record their opinion that some form of regulation of private companies should be adopted in each of the United States. What that form should be this commission is not prepared by any investigation or any study it has made to suggest.

Finally, we who stand in opposition to municipal ownership, speaking, we believe, for all individualists, arraign the arrogance of many of its advocates in assuming that they exclusively occupy the field of reform in dealing with the problems connected with that they are the sole promoters of measures of economic improvement in municipal affairs. We assert that the opponents of municipal ownership and operation, firm and consistent supporters of justice, are the class seeking the public welfare intelligently and in accordance with American principles. On this point we do not yield to any body of men.

We seek, as a first principle, to insure every man his own. In doing so and in endeavoring to protect the public against oppression and error we find it our duty to demonstrate the errors in the schemes of municipalizers and Socialists and to warn against the oppression that they threaten. We are resisting efforts to put burdens on the backs of the American people. We cannot and will not remain silent while the attempt is made to thrust costly and impracticable projects upon customers of public service corporations and upon the public at large.

We know the truth will out. We are confident that ultimately the American people must appreciate at their value the unsoundness of the arguments of the municipal Socialists. We shall aid in hastening the day when our fellow citizens will know through discussion what the public of London have been taught by bitter experience. London has awakened to the perils of municipalization, as is evidenced by its verdict in the recent borough and county elections. In that great city the municipalizers have led their fellow citizens astray, and their dupes, finding it out, have administered to their false guides an overwhelming rebuke.

We individualists are not seeking to lead the people in strange paths. Our aim is to keep them in the paths they have heretofore trod—paths well known, along which the American people have marched to heights of prosperity and civic development not known heretofore to the civilized world. Along these paths have been stumbling blocks. Our opponents are endeavoring to persuade us the sole responsibility for these stumbling blocks rests upon our public service system, to be remedied only by a change of system. This we deny. We are patiently studying the ways of justice. Municipalizers advocate experimenting at enormous cost with public funds, with the principles of liberty and with the institutions of our country. In this we stoutly refuse to take part.

XENIA'S LOSS \$90,000.

Depressing Experience of an Ohio City With Municipal Lighting.

In response to an inquiry in regard to the municipal electric light plant Mayor Brennan of Xenia, O., writes as follows:

"The city paid upward of \$21,000 for a light plant, and the cost of running the same was at the rate of \$108 per lamp. The plant was badly run, the operating of the same being in the hands of a committee of councilmen who were inexperienced and, of course, drawing big salaries, did not give it proper attention. All they got out of the sale of the works was \$2,500. The city afterward entered into a contract with a private corporation, and the price now paid per lamp is \$63."

Another authority states that the amount ultimately invested in the plant was \$35,000 and that the loss when it was sold, together with the excess cost of operation over what the lighting would have cost by contract, amounted to more than \$90,000; in other words, that that sum represents the cost of the experiment.
